

Directories **ETV Inside** is a professional tool which provides access to the up-to-the-minute information available on directoriesDATA, ensuring that your colleagues know exactly who's calling.

## PRODUCT FEATURES

Incoming calls are analysed and identified (with surname, first name, telephone number and address) on the display of your VoIP enabled device (computer, telephone, smartphone etc.). **ETV Inside** provides rapid access to up-to-the-minute directory data entries listed on directoriesDATA's ETV (electronic data directory) tool.

## BENEFITS

Your colleagues can identify the caller and prepare themselves for the discussion appropriately.

- ✓ Data updated on a daily basis
- ✓ Delivery of advertising stars (\*) for call barring service
- ✓ Increased information transparency
- ✓ Workplace convenience
- ✓ Provides data without unwanted advertising content
- ✓ Rapid information display
- ✓ No media discontinuity
- ✓ Added value for your colleagues
- ✓ Outstanding value for money

## INTEGRATION

**ETV Inside** can be easily integrated into an existing ICT environment using a metadirectory service or XML Web service. The installation can be carried out by your ICT department or by one of our partners.
