

Directories **ETV Access** is a professional tool which provides access to our up-to-the-minute directory data via Web services. Its use of XML standards allows for complete flexibility when it comes to integrating and processing your data.

## CONDITIONS FOR USE

In order to be able to access our directory data from your preferred programs, you will need to set up an interface with **ETV Access**. You can either program this yourself, or you can commission one of our partners to develop it. For integration into Outlook or SAP, our partners have a number of ready-made AddOns available for you to use.

## PRODUCT FEATURES

- ✓ Integration of up-to-date directory data into any software
- ✓ Available as REST and SOAP API
- ✓ Search function, reverse search function, entry search function, zip/location search function
- ✓ Delivery of advertising stars (\*) for call barring service
- ✓ Assigns company names during telephone number requests from extension ranges (as long as data is available)
- ✓ High-performing systems
- ✓ Up to 200 entries are displayed per request

## PRICES

Regardless of actual use, a minimum amount of CHF 250.00 is invoiced for data retrieval each calendar month. This amount includes 12,500 data elements or 2,500.

Additional data requests which exceed the monthly data retrieval allowance are invoiced either per data element or per transaction. You will have the option of choosing between these two invoicing models.

Prices quoted do not include Swiss or foreign taxes or other charges required by law (in particular, they do not include VAT).

## INVOICING MODEL 1: DATA ELEMENTS

A sum of CHF 0.02 is added to your invoice for each chargeable data element provided by **ETV Access**. Chargeable data elements are:

- Telephone, mobile and fax numbers
- E-mail address
- URLs
- Category (business category)
- Geodata (MapX/MapY)

## INVOICING MODEL 2: TRANSACTIONS

Any action which triggers a request is regarded as a transaction and is charged at CHF 0.10.
